

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

Claim 1 (Currently Amended): A ~~superdistribution method, in a telecommunication network having a plurality of terminals, for permitting a first user of a first terminal to distribute content stored in said first terminal to a second user of a second terminal to permit said second user to inspect and purchase said content if desired, said superdistribution method comprising the steps of method comprising:~~

~~transmitting a first content package including said content from said first terminal to said second terminal;~~

~~receiving, at a second terminal, the a first content package including content in said second terminal from a first terminal through a network,~~ wherein the first content package is stored on the second terminal in a manner that does not permit the permanent storage of the content on the second terminal;

determining whether a received input corresponds to a request to purchase the content; and

in response to determining that the received input corresponds to a request to purchase the content, permanently storing a copy of the content in said second terminal, wherein permanent storage of the copy is enabled by a second content package.

Claim 2 (Currently Amended): The method according to claim 1, wherein said network is a cellular telecommunications network ~~is a cellular network.~~

Claim 3 (Currently Amended): The method according to claim 1, wherein said permanently storing ~~step the copy of the content includes~~ comprises the steps of:

customizing the features of the copy based on prestored profile information, wherein the prestored profile information includes capabilities and functions of said second terminal; and permanently storing the customized copy in said second terminal.

Claim 4 (Currently Amended): The method according to claim 1, wherein permanently storing the copy of the content includes~~said permanently storing step comprises the steps of:~~
retrieving identity information of the second terminal; and
permanently storing said identity information in said second terminal together with the received content.

Claim 5 (Previously Presented): The method according to claim 1, wherein the permanently stored copy is extracted from the second content package.

Claim 6 (Currently Amended): The method according to claim 5, wherein permanently storing the copy of the content includes~~said permanently storing step comprises the steps of:~~
customizing the features of the copy based on prestored profile information, wherein the prestored profile information includes capabilities and functions of said second terminal; and
permanently storing the customized copy in said second terminal.

Claim 7 (Previously Presented): The method according to claim 1, wherein the permanently stored copy is an altered version of the content received in the first content package.

Claim 8 (Currently Amended): The method according to claim 7, wherein permanently storing the copy of the content includes~~said permanently storing step comprises the steps of:~~
customizing the features of the copy based on prestored profile information, wherein the prestored profile information includes capabilities and functions of said terminal; and
permanently storing the customized copy in said second terminal.

Claim 9 (Previously Presented): The method according to claim 1, wherein a first user receives at least one of a discount, a rebate, a credit and a payment in response to determining that the received input corresponds to a purchase request.

Claim 10 (Currently Amended): The method according to claim 9, wherein permanently storing the copy of the content includes ~~said permanently storing step comprises the steps of:~~

customizing the features of the content based on prestored profile information, wherein the prestored profile information includes capabilities and functions of said second terminal; and permanently storing the customized content in said second terminal.

Claim 11 (Currently Amended): The method according to claim 1, wherein the second terminal receives, from the ~~telecommunications network~~, one or more offers associated with one or more selectable items of content in response to determining that the input corresponds to a request to purchase the content.

Claim 12 (Currently Amended): The method according to claim 11, further including ~~the step of receiving a selection of one of the~~ an item of content from one or more selectable items of content, wherein the selected item of content is permanently stored in said second terminal.

Claim 13 (Currently Amended): The method according to claim 12, wherein ~~said permanently storing step comprises the steps of~~ the selected item of content is permanently stored by:

customizing the features of the selected item of content based on prestored profile information, wherein the prestored profile information includes capabilities and functions of said second terminal; and

permanently storing the customized selected item of content in said second terminal.

Claim 14 (Currently Amended): The method according to claim 1, wherein the first user of the first terminal is permitted to implement business methods based on ~~the a~~ superdistribution of content in the telecommunications network.

Claims 15-24 (Cancelled).

Claim 25 (Currently Amended): ~~A superdistribution system for superdistributing content in a telecommunications network, said superdistribution system~~ **An apparatus comprising:**

~~..... a processor; and~~
~~..... memory configured store computer readable instructions that, when executed by the processor, cause the apparatus to perform a method comprising:~~
~~..... receiving a first content package including content from a terminal through a network, wherein the first content package is stored on the apparatus in a manner that does not permit the permanent storage of the content in the apparatus;~~
~~..... determining whether a received input corresponds to a request to purchase the content; and~~
~~..... in response to determining that the received input corresponds to a request to purchase the content, permanently storing a copy of the content in an apparatus, wherein permanent storage of the copy is enabled by a second content package.~~
~~..... a first terminal being used by a first user; and~~
~~..... a second terminal being used by a second user;~~
~~..... wherein said first terminal transmits a first content package, wherein the first content package includes said content stored in said first terminal, to said second terminal prior to a second user purchasing the content; and~~
~~..... wherein said second terminal receives the first content package, wherein the first content package is stored on the second terminal in a manner that does not permit permanent storage of said content on the second terminal;~~
~~..... wherein the second terminal determines whether received input corresponds to a request to purchase the content;~~
~~..... wherein the second terminal automatically discards said content if the received input does not correspond to a request to purchase the content; and~~
~~..... wherein the second terminal permanently stores a second content package in response to a determination that the received input corresponds to a request to purchase the content, the second content package including a copy of said content.~~

Claim 26 (Currently Amended): ~~The system~~The apparatus according to claim 25, wherein said ~~telecommunications network~~ is a cellular telecommunications network.

Claim 27 (Currently Amended): ~~The system~~The apparatus according to claim 25, wherein said ~~second terminal apparatus~~, when permanently storing the ~~second content package~~copy of the content, customizes the features of the copy of the content based on prestored profile information, wherein the prestored profile information includes capabilities and functions of said ~~second terminal apparatus~~, and wherein the ~~second terminal apparatus~~ permanently stores the customized copy of the content.

Claim 28 (Currently Amended): ~~The system~~The apparatus according to claim 25, wherein the second content package is received ~~from through the telecommunications network~~ and wherein the second content package enables permanent storage of the content.

Claim 29 (Currently Amended): ~~The system~~The apparatus according to claim 28, wherein said ~~second terminal apparatus~~ customizes the features of the content based on prestored profile information, wherein the prestored profile information includes capabilities and functions of said ~~second terminal apparatus~~, and permanently stores the customized content.

Claim 30 (Currently Amended): ~~The system~~The apparatus according to claim 25, wherein said ~~second terminal apparatus~~ changes said content received from said ~~first terminal terminal~~ in a manner to permit said content to be permanently stored in said ~~second terminal apparatus~~, and permanently stores the changed content in the ~~second terminal apparatus~~.

Claim 31 (Currently Amended): ~~The system~~The apparatus according to claim 30, wherein said ~~second terminal apparatus~~ customizes the features of the content based on prestored profile information, wherein the prestored profile information includes capabilities and functions of said ~~second terminal apparatus~~, and permanently stores the customized content in the ~~second terminal apparatus~~.

Claim 32 (Currently Amended): ~~The system~~The apparatus according to claim 25, wherein in response to a determination that the received input corresponds to a request to purchase the content, receiving, at the ~~first terminal~~terminal, at least one of a discount, a rebate, a credit, and a payment.

Claim 33 (Currently Amended): ~~The system~~The apparatus according to claim 32, wherein said ~~second-terminal~~apparatus customizes the features of the content based on prestored profile information, wherein the prestored profile information includes capabilities and functions of said ~~second-terminal~~apparatus, and ~~wherein the apparatus~~ permanently stores the customized content in the ~~second-terminal~~apparatus.

Claim 34 (Currently Amended): ~~The system~~The apparatus according to claim 25, wherein, in response to a determination that the received input corresponds to a request to purchase said content, receiving, at the ~~second-terminal~~apparatus, an offer for one or more selectable items of content.

Claim 35 (Currently Amended): ~~The system~~The apparatus according to claim 34, further including ~~a step of~~ receiving, at the ~~second-terminal~~apparatus, a selection of ~~the an item of content from the~~ one or more selectable items of content, wherein the selected item of content is permanently stored in said ~~second-terminal~~apparatus.

Claim 36 (Currently Amended): ~~The system~~The apparatus according to claim 35, wherein said ~~second-terminal~~apparatus customizes the features of the selected item of content based on prestored profile information, wherein the prestored profile information includes capabilities and functions of said ~~second-terminal~~apparatus, and permanently stores the customized ~~selected~~ item of content.

Claim 37 (Currently Amended): ~~The system~~The apparatus according to claim 25, wherein the user of the ~~first terminal~~terminal is permitted to implement business methods based on the superdistribution of content in the telecommunications network.

Claims 38-79 (Cancelled).
